Difference in Full and Half Set Mould

MINGYUAN MACHINERY

Full Set Mould

MINGYUAN MACHINERY

MINGYUAN MACHINERY

MINGYUAN MACHINERY

Different Size Cups with different bottom diameter and angle, (Difficult to change mould). We NO Suggestion Client to change Full Set Mould which easy be trouble of machine. For One Set machine is better goes with 1-2 extra half sets mould

Half Set Mould

Different Size Cups with same bottom diameter and angle, Just different size in cup height and Top Dia.

Paper Fan Heating Sealing Option

Ultrasonic Heater

Ultrasonic heater suitable for sealing the Single PE / Double PE paper.
Paper weight 140GSM-350GSM.

Copper Heater

Copper heater suitable for sealing the Single PE,
Paper weight 140GSM-250GSM

Ultrasonic Heater System

Ultrasonic heater system is with electric control box and voltage regulator which is provided for free to protect the ultrasonic electric system

Ultrasonic Electric Control Box

Ultrasonic Electric Control Box

If the voltage is 380v, you need to connect a voltage regulator, if it is 220v, you don't need it

(above spare parts are only available in ultrasonic heater machine)

FAQ of Paper Cup Machine

MINGYUAN MACHINERY

Q How will the machine be repaired if there are faults, and what is the warranty?

A Our engineer team will send the **operation video** to guide you to solve the problem .if the spare parts is broken in the warranty period, we will send you the **new replacement parts for free.**

Q What is the raw materials for the paper cup machine ?

A Raw materials : **Single /double PE coated paper fan** which is already cut and printed , **bottom paper roll** .
PS: Machine is without printing and cutting function(only can cut bottom roll paper, it can not cut the paper fan)

Q What else we need to start the production ?

A Food grade or silicone oil and a small air compressor.
(No air heating without compressor)

FAQ of Paper Cup Machine

MINGYUAN
MACHINERY

**Q One machine is with just one mould or several mould?
Can we make difference size of the cup in one machine?**

A One machine is installed one full set mould for free. You can buy extra half set mould (easy to change) or full set mould (difficult :1% success rate). We only recommend to change 1-3 sets half set mould (with same bottom diameter size) in one machine .

Q What is the delivery time after the order ?

A We have only half finished machine (no mould) in stock. The mould design is customized as each **customer requirement**. The mould production costs 20 days,10 days for the installation. The delivery time is **30-35 days** after the deposit payment .

Q How can I install the machine and get training services in my country?

A The machine will be finished installation and tested running perfectly before the delivery . You will get the complete machine which is finished installation. We will provide the full operation and training Videos to guide you to run the machine . Anyone can install the machine and operate it easily.

**Q What is the power consumption?
what is the Voltage and Phases can the machine use?**

A The total power is around **4.5KW** , the Voltage can be **380 V three phases , 220V single /three phases** . the electric system can be customized as client requirement.

Advantages Comparisons

Ten Moulds

Eight Moulds

Main Turnplate: The main turnplate Design is installed with ten moulds which can makes speed faster.

Four Bottom Heater System

Three Bottom Heater System

Bottom Heater System: The new Design adds a bottom heating system more than the old Design which make the paper cup sealing effect is more better.

Advantages Comparisons

Central Shaft

New Design: Large and thick central shaft makes machine run stably at high speed without shaking.

Old design

Easy to shake when running at high speed.

Vaccum Suction Generator

Prevent wet air with water from entering solenoid valve, longer service life, more stable and better.

Air Cylinder

Paper suction is controlled by air cylinder, long time running will make the air sealing ring very hot and be broken easily, and cause air leaking issue.

Full Gear Driving System

Main mechanism and moving parts are controlled by stronger and durable gears which is more efficient and more stronger than chain and axis. (support stable running speed 110-120 pcs/min, longer service life, less troubles and lower noise)

Old Design

Slow speed, loud noise, and easy to damage.

Advantages Comparisons

Robot Hand Cup Feeding Device

New Design: 4 in 1 rotary robot hand cup feeding device make machine run more stable and higher speed which can be more than 110-120pcs/min and lower noise.

12 PCS honeywell relay

Best Imported US brand relay , best quality and longer service life.

Old Design

Only single robot hand cup feeder and speed will be lower.

Other

It is inferior brand and will be broken easily.(quality is not assured)

12 Pcs Of Sensor

MINGYUAN
MACHINERYMINGYUAN
MACHINERY

12 PCS of sensor: It can detect the full working process of the machine like paper less ,paper stuck,paper tube blocking, hot air blowing,bottom paper feeding and cup passing by errors。 It will send alarm and ensure machine inside spare parts less collision issues,and run more stable.

Others: Less sensors only 6 pcs,machine running process will cause some issues and finished cups will be not good.

Oil Lubrication and Circulation

MINGYUAN
MACHINERYMINGYUAN
MACHINERYMINGYUAN
MACHINERYMINGYUAN
MACHINERY**COPPER PIPE****OIL MOTOR****FILTER**

The whole machine adopts automatic oil lubrication system (oil circulation system is including oil motor, filter, copper pipe) which makes all gear moving parts working at high speed much more smoothly and greatly Improve the service life of spare parts .
